

Surgical Techniques and Innovations

A technical working group meeting

27th & 28th February 2019

The LASA Animal Science (Transgenic) Section[†] invites you to our first technical forum on the topic of **Surgical Techniques and Innovations** at Harwell Science and Innovation Campus, Oxfordshire.

This two day meeting will give you the opportunity to network with others from the UK working in the transgenic field.

The meeting has a flexible layout with short technical presentations, followed by sessions dedicated to open discussions. Participants' will learn from each other's experiences and together we will endeavour to improve welfare of the animals in our care and ultimately the quality of the science we are involved with.

We will cover a number of topics including;

- practical aseptic technique
- surgical refinements
- non-surgical approaches
- the use of vasectomies & sterile males
- ovary transplants.
